|
Filed March 8, 2018

|
Amended April 20, 2018

Synopsis

Background: Customers, whose personal information was stolen from hackers, brought putative class action against online retailer, alleging retailer did not adequately protect their personal information. The United States District Court for the District of Nevada, No. 3:12-cv-00325-RCJ-VPC, [Robert Clive Jones](#), Senior District Judge,  2016 WL 2637810, dismissed. Customers appealed.

[Holding:] The Court of Appeals, [Friedland](#), Circuit Judge, held that customers sufficiently alleged injury in fact and, thus, had standing.

Reversed and remanded.

Opinion, 884 F.3d 893, superseded.

Procedural Posture(s): On Appeal; Motion to Dismiss for Lack of Standing.

[4] Federal Civil Procedure

 Consumers, purchasers, borrowers, and debtors

Finance, Banking, and Credit

 Right of action; standing

Customers, whose personal information was stolen from hackers, sufficiently alleged injury in fact and, thus, had standing to bring putative class action against online retailer, alleging retailer did not adequately protect their personal information; customers alleged

that type of information accessed in breach, which included names, account numbers, passwords, e-mail addresses, billing and shipping addresses, telephone numbers, and credit and debit card information, could be used to commit identity theft, including by placing them at higher risk of “phishing” and “pharming,” which were ways for hackers to exploit information they already had to get even more personal information.

ORDER

***1022** The opinion filed on March 8, 2018, and appearing at [884 F.3d 893](#), is amended as follows. On page 899:

Replace <Zappos is mistaken ... the present> with <Zappos initially contended on appeal that the relevant time at which to assess standing was the present. But it could not offer any support for that contention. After our opinion was initially filed, Zappos sought rehearing on this issue, urging us to read [Rockwell International Corp. v. United States](#), 549 U.S. 457, 473, 127 S.Ct. 1397, 167 L.Ed.2d 190 (2007), and [Northstar Financial Advisors Inc. v. Schwab Investments](#), 779 F.3d 1036, 1044 (9th Cir. 2015), to require that we assess standing at the time Plaintiffs filed their operative Third Amended Complaint, rather than their original Complaints. But whether we look at the original Complaints or Plaintiffs’ Third Amended Complaint, the allegations about the increased risk of harm Plaintiffs face are relevantly the same—in the Complaints, Plaintiffs allege that the Zappos data breach places them at imminent risk of identity theft. Zappos argues that this allegation is implausible, but it does so by relying on facts outside the Complaints (or contentions about the absence of certain facts), which makes its argument one that may be appropriate for summary judgment but not one that may support a facial challenge to standing at the motion to dismiss stage>.

Following <rather than their original Complaints.> in the above replacement text, insert a footnote <Zappos’s reliance on these cases is also unconvincing, as these cases do not actually address whether standing is measured at the time of an initial complaint or at the time of an amended complaint, as opposed to whether the allegations in an amended complaint may sometimes be considered in evaluating whether there was standing at the time the case was originally filed or whether an amended complaint may be considered a supplemental pleading under [Federal Rule of Civil Procedure 15\(d\)](#)>.

Following <imminent risk of identity theft.> in the above replacement text, insert a footnote <Plaintiff Robert Ree does not clearly allege a risk of future identity theft. But even assuming Ree would not have had standing on his own based on his original Complaint, only one Plaintiff needs to have standing for a class action to proceed. See [Bates v. United Parcel Serv., Inc.](#), 511 F.3d 974, 985 (9th Cir. 2007) (en banc)>.

In the current footnote 11, delete <; [Mollan v. Torrance](#), 22 U.S. 537, 9 Wheat. 537, 6 L.Ed. 154 (1824)>.

With these amendments, the panel has unanimously voted to deny appellee’s petition for rehearing. Judge Owens and Judge Friedland have voted to deny the petition for rehearing en banc. Judge Bucklo recommends denial of the petition for rehearing en banc. The full court has been advised of the petition for rehearing en banc, and no judge has requested a vote on whether to rehear the matter en banc. [Fed. R. App. P. 35](#).

The petitions for rehearing and rehearing en banc are **DENIED**. No further petitions shall be entertained.

*1023 OPINION

[FRIEDLAND](#), Circuit Judge:

In January 2012, hackers breached the servers of online retailer Zappos.com, Inc. (“Zappos”) and allegedly stole the names, account numbers, passwords, email addresses, billing and shipping addresses, telephone numbers, and credit and debit card information of more than 24 million Zappos customers. Several of those customers filed

putative class actions in federal courts across the country, asserting that Zappos had not adequately protected their personal information. Their lawsuits were consolidated for pretrial proceedings.

Although some of the plaintiffs alleged that the hackers used stolen information about them to conduct subsequent financial transactions, the plaintiffs who are the focus of this appeal (“Plaintiffs”) did not. This appeal concerns claims based on the hacking incident itself, not any subsequent illegal activity.

The district court dismissed Plaintiffs’ claims for lack of Article III standing. In this appeal, Plaintiffs contend that the district court erred in doing so, and they press several potential bases for standing, including that the Zappos data breach put them at risk of identity theft.

We addressed standing in an analogous context in [Krottner v. Starbucks Corp.](#), 628 F.3d 1139 (9th Cir. 2010). There, we held that employees of Starbucks had standing to sue the company based on the risk of identity theft they faced after a company laptop containing their personal information was stolen. [Id.](#) at 1140, 1143. We reject Zappos’s argument that [Krottner](#) is no longer good law after [Clapper v. Amnesty International USA](#), 568 U.S. 398, 133 S.Ct. 1138, 185 L.Ed.2d 264 (2013), and hold that, under [Krottner](#), Plaintiffs have sufficiently alleged standing based on the risk of identity theft.¹

I.

When they bought merchandise on Zappos’s website, customers provided personal identifying information (“PII”), including their names, account numbers, passwords, email addresses, billing and shipping addresses, telephone numbers, and credit and debit card information. Sometime before January 16, 2012, hackers targeted Zappos’s servers, stealing the PII of more than 24 million of its customers, including their full credit card numbers.² On January 16, Zappos sent an email to its customers, notifying them of the theft of their PII. The company recommended “that they reset their Zappos.com account passwords and change the passwords ‘on any other web site where [they] use the same or a similar password.’” Some customers responded

almost immediately by filing putative class actions in federal district courts across the country.

In these suits, Plaintiffs alleged an “imminent” risk of identity theft or fraud from the Zappos breach. Relying on definitions *1024 from the United States Government Accountability Office (“GAO”), they characterized “identity theft” and “identity fraud” as “encompassing various types of criminal activities, such as when PII is used to commit fraud or other crimes,” including “credit card fraud, phone or utilities fraud, bank fraud and government fraud.”³

The Judicial Panel on Multidistrict Litigation transferred several putative class action lawsuits alleging harms from the Zappos data breach to the District of Nevada for pretrial proceedings. After several years of pleadings-stage litigation, including a hiatus for mediation, the district court granted in part and denied in part Zappos’s motion to dismiss the Third Amended Consolidated Complaint (“Complaint”) and granted Zappos’s motion to strike the Complaint’s class allegations. The court distinguished between two groups of plaintiffs: (1) plaintiffs named only in the Third Amended Complaint who alleged that they had already suffered financial losses from identity theft caused by Zappos’s breach, and (2) plaintiffs named in earlier complaints who did not allege having already suffered financial losses from identity theft.

The district court ruled that the first group of plaintiffs had Article III standing because they alleged “that actual fraud occurred as a direct result of the breach.” But the court ruled that the second group of plaintiffs (again, here referred to as “Plaintiffs”) lacked Article III standing and dismissed their claims without leave to amend because Plaintiffs had “failed to allege instances of actual identity theft or fraud.” The parties then agreed to dismiss all remaining claims with prejudice, and Plaintiffs appealed.

II.

[1] [2] [3] We review the district court’s standing determination de novo. See [Maya v. Centex Corp.](#), 658 F.3d 1060, 1067 (9th Cir. 2011). To have Article III standing,

a plaintiff must show (1) it has suffered an “injury in fact” that is (a) concrete and particularized and (b) actual or imminent, not conjectural or hypothetical; (2) the injury is fairly traceable to the challenged action of the defendant; and (3) it is likely, as opposed to merely speculative, that the injury will be redressed by a favorable decision.

[Friends of the Earth, Inc. v. Laidlaw Envtl. Servs. \(TOC\), Inc.](#), 528 U.S. 167, 180–81, 120 S.Ct. 693, 145 L.Ed.2d 610 (2000); see also [Spokeo, Inc. v. Robins](#), — U.S. —, 136 S.Ct. 1540, 1547, 194 L.Ed.2d 635 (2016). A plaintiff threatened with future injury has standing to sue “if the threatened injury is ‘certainly impending,’ or there is a ‘substantial risk that the harm will occur.’” [Susan B. Anthony List v. Driehaus](#), — U.S. —, 134 S.Ct. 2334, 2341, 189 L.Ed.2d 246 (2014) (quoting [Clapper v. Amnesty Int’l USA](#), 568 U.S. 398, 414 & n.5, 133 S.Ct. 1138, 185 (L.Ed.2d 264 2013)) (internal quotation marks omitted).

III.

We addressed the Article III standing of victims of data theft in [*1025 Krottner v. Starbucks Corp.](#), 628 F.3d 1139 (9th Cir. 2010). In [Krottner](#), a thief stole a laptop containing “the unencrypted names, addresses, and social security numbers of approximately 97,000 Starbucks employees.” [Id.](#) at 1140. “Starbucks sent a letter to ... affected employees alerting them to the theft and stating that Starbucks had no indication that the private information ha[d] been misused,” but advising them to “monitor [their] financial accounts carefully for suspicious activity and take appropriate steps to protect [themselves] against potential identity theft.” [Id.](#) at 1140–41 (internal quotation marks omitted). Some employees sued, and the only harm that most alleged was an “increased risk of future identity theft.”

[Id.](#) at 1142. We determined this was sufficient for Article III standing, holding that the plaintiffs had “alleged a credible threat of real and immediate harm” because the laptop with their PII had been stolen. [Id.](#) at 1143.

A.

Before analyzing whether [Krottner](#) controls this case, we must determine whether [Krottner](#) remains good law after the Supreme Court’s more recent decision in [Clapper v. Amnesty International USA](#), 568 U.S. 398, 133 S.Ct. 1138, 185 L.Ed.2d 264 (2013), which addressed a question of standing based on the risk of future harm.

As a three-judge panel, we are bound by opinions of our court on issues of federal law unless those opinions are “clearly irreconcilable” with a later decision by the Supreme Court or our court sitting en banc. [Miller v. Gammie](#), 335 F.3d 889, 900 (9th Cir. 2003) (en banc). This is the first case to require us to consider whether [Clapper](#) and [Krottner](#) are clearly irreconcilable, and we conclude that they are not.

The plaintiffs in [Clapper](#) challenged surveillance procedures authorized by the Foreign Intelligence Surveillance Act of 1978—specifically, in [50 U.S.C. § 1881a](#) (2012) (amended 2018).⁴ [Clapper](#), 568 U.S. at 401, 133 S.Ct. 1138. The plaintiffs, who were “attorneys and human rights, labor, legal, and media organizations whose work allegedly require[d] them to engage in sensitive and sometimes privileged telephone and e-mail communications with ... individuals located abroad,” sued for declaratory relief to invalidate [§ 1881a](#) and an injunction against surveillance conducted pursuant to that section. [Id.](#) at 401, 406, 133 S.Ct. 1138. The plaintiffs argued that they had Article III standing to challenge [§ 1881a](#) “because there [was] an objectively reasonable likelihood that their communications [would] be acquired under [§ 1881a](#) at some point in the future.” [Id.](#) at 401, 133 S.Ct. 1138. The Supreme Court rejected this basis for standing, explaining that “an objectively reasonable

likelihood” of injury was insufficient, and that the alleged harm needed to “satisfy the well-established requirement that threatened injury must be ‘certainly impending.’ ”

[Id.](#) (quoting [Whitmore v. Arkansas](#), 495 U.S. 149, 158, 110 S.Ct. 1717, 109 L.Ed.2d 135 (1990)).

The Court then held that the plaintiffs’ theory of injury was too speculative to constitute a “certainly impending” injury. *1026 [Id.](#) at 410, 133 S.Ct. 1138. The plaintiffs had not alleged that any of their communications had yet been intercepted. [Id.](#) at 411, 133 S.Ct. 1138. The Court characterized their alleged injury as instead resting on a series of inferences, including that:

- (1) the Government will decide to target the communications of non–U.S. persons with whom they communicate; (2) in doing so, the Government will choose to invoke its authority under [§ 1881a](#) rather than utilizing another method of surveillance; (3) the Article III judges who serve on the Foreign Intelligence Surveillance Court will conclude that the Government’s proposed surveillance procedures satisfy [§ 1881a](#)’s many safeguards and are consistent with the Fourth Amendment; (4) the Government will succeed in intercepting the communications of respondents’ contacts; and (5) respondents will be parties to the particular communications that the Government intercepts.

[Id.](#) at 410, 133 S.Ct. 1138. The Court declined to speculate about what it described as independent choices by the government about whom to target for surveillance and what basis to invoke for such targeting, or about whether the Foreign Intelligence Surveillance Court would approve any such surveillance. [Id.](#) at 412–13, 133 S.Ct. 1138. The plaintiffs’ multi-link chain of inferences

was thus “too speculative” to constitute a cognizable injury in fact. [Id.](#) at 401, 133 S.Ct. 1138.

Unlike in [Clapper](#), the plaintiffs’ alleged injury in [Krottner](#) did not require a speculative multi-link chain of inferences. See [Krottner](#), 628 F.3d at 1143. The [Krottner](#) laptop thief had all the information he needed to open accounts or spend money in the plaintiffs’ names—actions that [Krottner](#) collectively treats as “identity theft.” [Id.](#) at 1142. Moreover, [Clapper](#)’s standing analysis was “especially rigorous” because the case arose in a sensitive national security context involving intelligence gathering and foreign affairs, and because the plaintiffs were asking the courts to declare actions of the executive and legislative branches unconstitutional. [Clapper](#), 568 U.S. at 408, 133 S.Ct. 1138 (quoting [Raines v. Byrd](#), 521 U.S. 811, 819, 117 S.Ct. 2312, 138 L.Ed.2d 849 (1997)). [Krottner](#) presented no such national security or separation of powers concerns.

And although the Supreme Court focused in [Clapper](#) on whether the injury was “certainly impending,” it acknowledged that other cases had focused on whether there was a “substantial risk” of injury.⁵ [Id.](#) at 414 & n.5, 133 S.Ct. 1138. Since [Clapper](#), the Court reemphasized in [Susan B. Anthony List v. Driehaus](#), — U.S. —, 134 S.Ct. 2334, 189 L.Ed.2d 246 (2014), that “[a]n allegation of future injury may suffice if the threatened injury is ‘certainly impending,’ or there is a ‘substantial risk that the harm will occur.’” [Id.](#) at 2341 (quoting [Clapper](#), 568 U.S. at 414 & n.5, 133 S.Ct. 1138) (internal quotation marks omitted).

For all these reasons, we hold that [Krottner](#) is not clearly irreconcilable with [Clapper](#) and thus remains binding.⁶ See [Miller](#), 335 F.3d at 900.

***1027 B.**

We also conclude that [Krottner](#) controls the result here.

In [Krottner](#), we held that the plaintiffs had “alleged a credible threat of real and immediate harm stemming from the theft of a laptop containing their unencrypted personal data.” [628 F.3d at 1143](#). The threat would have been “far less credible,” we explained, “if no laptop had been stolen, and [they] had sued based on the risk that it would be stolen at some point in the future.” [Id.](#) But the sensitivity of the personal information, combined with its theft, led us to conclude that the plaintiffs had adequately alleged an injury in fact supporting standing. [Id.](#) The sensitivity of the stolen data in this case is sufficiently similar to that in [Krottner](#) to require the same conclusion here.

[4] Plaintiffs allege that the type of information accessed in the Zappos breach can be used to commit identity theft, including by placing them at higher risk of “phishing” and “pharming,” which are ways for hackers to exploit information they already have to get even more PII. Plaintiffs also allege that their credit card numbers were within the information taken in the breach—which was not true in [Krottner](#).⁷ And Congress has treated credit card numbers as sufficiently sensitive to warrant legislation prohibiting merchants from printing such numbers on receipts—specifically to reduce the risk of identity theft. See [15 U.S.C. § 1681c\(g\) \(2012\)](#). Although there is no allegation in this case that the stolen information included social security numbers, as there was in [Krottner](#), the information taken in the data breach still gave hackers the means to commit fraud or identity theft, as Zappos itself effectively acknowledged by urging affected customers to change their passwords on any other account where they may have used “the same or a similar password.”⁸

Indeed, the plaintiffs who alleged that the hackers had already commandeered their accounts or identities using information taken from Zappos specifically alleged that they suffered financial losses because of the Zappos data breach (which is why the district court held that they had standing). Although those plaintiffs’ claims are not at issue in this appeal, their alleged harm undermines Zappos’s assertion that the data stolen in the breach cannot be used for fraud or identity theft. In addition,

two plaintiffs whose claims are at issue in this appeal say that the hackers took over their AOL accounts and sent *1028 advertisements to people in their address books.⁹ Though not a financial harm, these alleged attacks further support Plaintiffs' contention that the hackers accessed information that could be used to help commit identity fraud or identity theft. We thus conclude that Plaintiffs have sufficiently alleged an injury in fact under [Krottner](#).

[5] [6] Zappos contends that even if the stolen data was as sensitive as that in [Krottner](#), too much time has passed since the breach for any harm to be imminent. Zappos initially contended on appeal that the relevant time at which to assess standing was the present. But it could not offer any support for that contention. After our opinion was initially filed, Zappos sought rehearing on this issue, urging us to read [Rockwell International Corp. v. United States](#), 549 U.S. 457, 473, 127 S.Ct. 1397, 167 L.Ed.2d 190 (2007), and [Northstar Financial Advisors Inc. v. Schwab Investments](#), 779 F.3d 1036, 1044 (9th Cir. 2015), to require that we assess standing at the time Plaintiffs filed their operative Third Amended Complaint, rather than their original Complaints.¹⁰ But whether we look at the original Complaints or Plaintiffs' Third Amended Complaint, the allegations about the increased risk of harm Plaintiffs face are relevantly the same—in the Complaints, Plaintiffs allege that the Zappos data breach places them at imminent risk of identity theft.¹¹ Zappos argues that this allegation is implausible, but it does so by relying on facts outside the Complaints (or contentions about the absence of certain facts), which makes its argument one that may be appropriate for summary judgment but not one that may support a facial challenge to standing at the motion to dismiss stage.¹²

Plaintiffs also specifically allege that “[a] person whose PII has been obtained and compromised may not see the full extent of *1029 identity theft or identity fraud for years.” And “it may take some time for the victim to become aware of the theft.”

Assessing the sum of their allegations in light of [Krottner](#), Plaintiffs have sufficiently alleged an injury in fact based on a substantial risk that the Zappos hackers will commit identity fraud or identity theft.¹³

C.

The remaining Article III standing requirements are also satisfied. Plaintiffs sufficiently allege that the risk of future harm they face is “‘fairly traceable’ to the conduct being challenged”—here, Zappos’s failure to prevent the breach.

[Wittman v. Personhuballah](#), — U.S. —, 136 S.Ct. 1732, 1736, 195 L.Ed.2d 37 (2016) (quoting [Lujan v. Defs. of Wildlife](#), 504 U.S. 555, 560–61, 112 S.Ct. 2130, 119 L.Ed.2d 351 (1992)).

That hackers might have stolen Plaintiffs’ PII in unrelated breaches, and that Plaintiffs might suffer identity theft or fraud caused by the data stolen in those other breaches (rather than the data stolen from Zappos), is less about standing and more about the merits of causation and damages. As the Seventh Circuit recognized in [Remijas v. Neiman Marcus Group, LLC](#), 794 F.3d 688 (7th Cir. 2015), that “some other store *might* [also] have caused the plaintiffs’ private information to be exposed does nothing to negate the plaintiffs’ standing to sue” for the breach in question.¹⁴ [Id.](#) at 696; cf. [Price Waterhouse v. Hopkins](#), 490 U.S. 228, 263, 109 S.Ct. 1775, 104 L.Ed.2d 268 (1989) (O’Connor, J., concurring in the judgment) (“[I]n multiple causation cases, ... the common law of torts has long shifted the burden of proof to multiple defendants to prove that their negligent actions were not the ‘but-for’ cause of the plaintiff’s injury.” (citing *1030 [Summers v. Tice](#), 33 Cal.2d 80, 199 P.2d 1, 3–4 (Cal. 1948))), *superseded on other grounds by* [42 U.S.C. § 2000e–2\(m\)](#) (2012).

[7] The injury from the risk of identity theft is also redressable by relief that could be obtained through this litigation. See [Lujan](#), 504 U.S. at 561, 112 S.Ct. 2130. If Plaintiffs succeed on the merits, any proven injury could be compensated through damages. See [Remijas](#), 794 F.3d at 696–97. And at least some of their requested injunctive relief would limit the extent of the threatened injury by helping Plaintiffs to monitor their credit and the like.¹⁵ See [Monsanto Co. v. Geertson Seed Farms](#), 561 U.S. 139, 154–55, 130 S.Ct. 2743, 177 L.Ed.2d 461 (2010).

IV.

For the foregoing reasons, we **REVERSE** the district court's judgment as to Plaintiffs' standing and **REMAND**.

Footnotes

- * The Honorable Elaine E. Bucklo, United States District Judge for the Northern District of Illinois, sitting by designation.
- 1 We address an issue raised by sealed briefing in a concurrently filed memorandum disposition.
- 2 Although Zappos asserts in its briefs that the hackers stole only the last four digits of customers' credit card numbers, it has presented its arguments as a facial, not a factual, attack on standing. See [Safe Air for Everyone v. Meyer](#), 373 F.3d 1035, 1039 (9th Cir. 2004) (distinguishing facial from factual attacks on standing). Where, as here, "a defendant in its motion to dismiss under [Federal Rule of Civil Procedure 12\(b\)\(1\)](#) asserts that the allegations in the complaint are insufficient to establish subject matter jurisdiction as a matter of law (to be distinguished from a claim that the allegations on which jurisdiction depends are not true as a matter of fact), we take the allegations in the plaintiff's complaint as true." [Whisnant v. United States](#), 400 F.3d 1177, 1179 (9th Cir. 2005).
- 3 Plaintiffs did not provide a precise cite but appear to be referring to the description of identity theft in a report entitled *Personal Information*, which explains that "[t]he term 'identity theft' is broad and encompasses many types of criminal activities, including fraud on existing accounts—such as unauthorized use of a stolen credit card number—or fraudulent creation of new accounts—such as using stolen data to open a credit card account in someone else's name." U.S. Gov't Accountability Office, GAO-07-737, *Personal Information: Data Breaches are Frequent, but Evidence of Resulting Identity Theft is Limited; However, the Full Extent is Unknown 2* (2007).
- 4 [50 U.S.C. § 1881a](#) authorizes electronic surveillance of foreign nationals located abroad under a reduced government burden compared with traditional electronic foreign intelligence surveillance. Compare [50 U.S.C. § 1805 \(2012\)](#) (amended 2018) (requiring "probable cause to believe ... the target of the electronic surveillance is a foreign power or an agent of a foreign power"), with [50 U.S.C. § 1881a](#) (requiring that surveillance not intentionally target people in the United States or United States nationals but not requiring any showing that the surveillance target is a foreign power or agent of a foreign power).
- 5 The Court noted that the plaintiffs in [Clapper](#) had not alleged a substantial risk because their theory of injury relied on too many inferences. [Clapper](#), 568 U.S. at 414 n.5, 133 S.Ct. 1138.
- 6 Our conclusion that [Krottner](#) is not clearly irreconcilable with [Clapper](#) is consistent with post-[Clapper](#) decisions in our sister circuits holding that data breaches in which hackers targeted PII created a risk of harm sufficient to support standing. For example, the D.C. Circuit held in [Attias v. Carefirst, Inc.](#), 865 F.3d 620 (D.C. Cir. 2017), *cert. denied*, — U.S. —, 138 S.Ct. 981, 200 L.Ed.2d 248 (2018), that "[n]o long sequence of uncertain contingencies involving multiple independent actors has to occur before the plaintiffs [who were victims of a data breach] will suffer any harm; a substantial risk of harm exists already, simply by virtue of the hack and the nature of the data that the plaintiffs allege was taken." [Id.](#) at 629; see also [Remijas v. Neiman Marcus Grp., LLC](#), 794 F.3d 688, 693 (7th Cir. 2015) ("Why else would hackers break into a store's database and steal consumers' private information? Presumably, the purpose of the hack is, sooner or later, to make fraudulent charges or assume those consumers' identities."). The Eighth Circuit did hold in [In re SuperValu, Inc., Customer Data Security Breach Litigation](#), 870 F.3d 763 (8th Cir. 2017), that allegations of the theft of credit card information were insufficient to support standing. [Id.](#) at 771–72. But no other PII, such as addresses, telephone numbers, or passwords, was stolen in that case. See [id.](#) at 766, 770. The Eighth Circuit acknowledged cases like [Attias](#) and [Remijas](#) but opined that standing questions in data breach cases "ultimately turn[] on the substance of the allegations before each court"—particularly, the types of data allegedly stolen. [Id.](#) at 769.

- 7 Plaintiffs include in the Complaint some emails sent to Zappos from other customers saying that their credit cards were fraudulently used following the breach.
- 8 We use the terms “identity fraud” and “identity theft” in accordance with the GAO definition Plaintiffs rely on in the Complaint. See *supra* note 3 and accompanying text.
- 9 The district court held that these plaintiffs nonetheless lacked standing because they had not suffered “additional misuse” or “actual damages” from the data breach.
- 10 Zappos’s reliance on these cases is also unconvincing, as these cases do not actually address whether standing is measured at the time of an initial complaint or at the time of an amended complaint, as opposed to whether the allegations in an amended complaint may sometimes be considered in evaluating whether there was standing at the time the case was originally filed or whether an amended complaint may be considered a supplemental pleading under [Federal Rule of Civil Procedure 15\(d\)](#).
- 11 Plaintiff Robert Ree does not clearly allege a risk of future identity theft. But even assuming Ree would not have had standing on his own based on his original Complaint, only one Plaintiff needs to have standing for a class action to proceed. See [Bates v. United Parcel Serv., Inc.](#), 511 F.3d 974, 985 (9th Cir. 2007) (en banc).
- 12 Of course, as litigation proceeds beyond the pleadings stage, the Complaint’s allegations will not sustain Plaintiffs’ standing on their own. See [Lujan v. Defs. of Wildlife](#), 504 U.S. 555, 561, 112 S.Ct. 2130, 119 L.Ed.2d 351 (1992) (“[E]ach element [of Article III standing] must be supported in the same way as any other matter on which the plaintiff bears the burden of proof, *i.e.*, with the manner and degree of evidence required at the successive stages of the litigation.”). In opposing a motion for summary judgment, for example, Plaintiffs would need to come forward with evidence to support standing. See *id.* But the passage of time does not change the relevant moment as to which Plaintiffs must establish that they had standing or heighten Plaintiffs’ burden in opposing the motion to dismiss. See *id.* A case may also, of course, become moot as time progresses. But there is no reason to doubt that Plaintiffs still have a live controversy against Zappos here. Cf. [Z Channel Ltd. P’ship v. Home Box Office, Inc.](#), 931 F.2d 1338, 1341 (9th Cir. 1991) (“If [a plaintiff] is entitled to collect damages in the event that it succeeds on the merits, the case does not become moot even though declaratory and injunctive relief are no longer of any use.”).
- 13 This conclusion is consistent with the Fourth Circuit’s decision in [Beck v. McDonald](#), 848 F.3d 262 (4th Cir. 2017), *cert. denied sub nom. Beck v. Shulkin*, — U.S. —, 137 S.Ct. 2307, 198 L.Ed.2d 728 (2017). The plaintiffs in [Beck](#), patients with personal data on a laptop stolen from a hospital, did not allege that the “thief intentionally targeted the personal information compromised in the data breaches.” *Id.* at 274. The Fourth Circuit held that the absence of such an allegation “render[ed] their contention of an enhanced risk of future identity theft too speculative.” *Id.* Here, by contrast, Plaintiffs allege that hackers specifically targeted their PII on Zappos’s servers. It is true that in [Beck](#) the Fourth Circuit opined that “‘as the breaches fade further into the past,’ the Plaintiffs’ threatened injuries become more and more speculative.” *Id.* at 275 (quoting [Chambliss v. Carefirst, Inc.](#), 189 F.Supp.3d 564, 570 (D. Md. 2016), and citing [In re Zappos.com, Inc.](#), 108 F.Supp.3d 949, 958 (D. Nev. 2015)). But the time since the data breach appears to have mattered in [Beck](#) because the court concluded that the plaintiffs lacked standing after the breach in the first place, so it made sense to consider whether any subsequent events suggested a greater injury than was initially apparent. See *id.* at 274.
- 14 [Clapper](#) is not to the contrary. In [Clapper](#), the Supreme Court held that, even assuming the plaintiffs were going to be surveilled, any future surveillance could not be traced to the challenged statute because the risk of being surveilled did not increase with the addition of the new statutory tool. [568 U.S. at 413, 133 S.Ct. 1138](#) (“[B]ecause respondents can only speculate as to whether any (asserted) interception would be under [§ 1881a](#) or some other authority, they cannot satisfy the ‘fairly traceable’ requirement.”). There were many surveillance options, all of which were in the hands of one actor: the government. Thus, a plaintiff’s risk of surveillance hinged on whether the government chose to surveil him in the first place. In contrast, with each new hack comes a new hacker, each of whom independently could choose to use the data to commit identity theft. This means that each hacking incident adds to the overall risk of identity theft.

And again, as explained above, the key injury recognized in  [Krottner](#) is the risk of being subject to identity theft, not actual identity theft.

15

Plaintiffs need only one viable basis for standing. See  [Douglas Cty. v. Babbitt](#), 48 F.3d 1495, 1500 (9th Cir. 1995). Because Plaintiffs sufficiently allege standing from the risk of future identity theft, we do not reach their other asserted bases for standing.
